Resou

About ✏️

Hi, I'm Neha, a B.Tech student specializing in Cybersecurity, with a growing interest in understanding how computer systems work and how they can be secured against threats.

As a beginner, I am currently learning programming and web development, while building a strong foundation in cybersecurity concepts. I believe that strong basics are essential for becoming a good cybersecurity professional.

I enjoy exploring new technologies, solving logical problems, and improving my technical skills step by step. I am focused on continuous learning, practicing regularly, and gaining hands-on experience through small projects and self-study.

My goal is to develop strong cybersecurity skills and, in the future, contribute to building secure, reliable, and efficient systems.
